SINA Apps – secure and flexible

Applications for the SINA Workstation

Towards a mobile office with SINA Apps

SINA Apps expand your possibilities to work with the SINA Workstation. Secure and flexible.

What are SINA Apps?

A SINA App is an application running on the SINA Workstation within a separate virtual session. It is a dedicated minimalized open guest system with a defined task. This means that the SINA App is optimally geared to specific usage scenarios.

More productivity with SINA Apps

SINA Apps extend the range of functions of the SINA Workstation and enable users to perform their tasks even more flexibly while on the move or in the home office. Our Hotspot App uses a public hotspot to establish a secure connection to the corporate network. This means waiting times at train stations and airports can be used productively without hesitation. With secunet Desktop, you can also participate in telephone or video conferences conveniently and without complications.

The SINA Private Browser allows free and secure browsing while preventing malware from infiltrating your confidential session.

Benefits

Higher data security
- by isolating applications
- through protection against unknown malware

Extended SINA Workstation
- Design the additional functionality of your SINA Workstation yourself.
- Install only the apps you really need.
Customization of SINA Apps
- Decide for yourself about features such as design and performance of your apps.
- Have apps customized to your exact needs.

SINA Apps at a glance

Hotspot App

Connect securely to the corporate network via a public hotspot:
- Ease of use and low resource requirements
- Secure connection establishment over potentially insecure networks

Private Browser

Open access to the Internet via a separated browser:
- Unrestricted and secure surfing
- A malware attack does not compromise the overall system

secunet Desktop

Open guest system to use different collaboration applications:
- Automatic updates managed by secunet
- Regular extension of supported applications

secunet – protecting digital infrastructures

secunet is Germany's leading cybersecurity company. In an increasingly connected world, the company's combination of products and consulting assures resilient digital infrastructures and the utmost protection for data, applications and digital identities. secunet specialises in areas with unique security requirements – such as cloud, IIoT, eGovernment and eHealth. With security solutions from secunet, companies can maintain the highest security standards in digitisation projects and advance their digital transformation.

Over 1,000 experts strengthen the digital sovereignty of governments, businesses and society. secunet's customers include federal ministries, more than 20 DAX-listed corporations as well as other national and international organisations. The company was established in 1997, is listed in the SDAX and generated revenues of around 347 million euros in 2022.

secunet is an IT security partner to the Federal Republic of Germany and a partner of the German Alliance for Cyber Security.
